LONG-TERM SUCCESS RELIES ON SOLID TECHNOLOGY PARTNERSHIPS

- Leading edge technology alone does not equate to long-term success. In today's competitive landscape, success rides on a company's ability to gain efficiency through cost effectively integrating key people, process, technology and partnerships.
- As a technology partner since 1987, value comes with success and takes on many forms; longevity, financial stability, trust, teamwork, communication, service level and mutual loyalty.
- Computex Advanced Technology Services Team offers a wide range of expertise in assessment, planning, strategic design requirements, proof of concept, implementation, operational support, procurement and configuration services. Computex has focused its Delivery Offerings in three strategic areas;
 - Data Center Practice
 - Virtualization Practice
 - ERP Consulting Practice

TECHNOLOGY SOLUTION OPTIONS KEY CONFIDENCE IN COMPETITIVE TIMES

- Options that best fit are the keys to a competitive advantage.
